

K-12 FOOD + RESCUE

K-12 Food Rescue connects schools with caring agencies willing to pick up Unpeeled, Unopened, Unwanted food from the trays of students that they choose not to eat.

WHY SHOULD YOUR SCHOOL RESCUE FOOD?	
Methane Gas	Methane gas is 21 times more harmful to the environment than CO2 gas, therefore, our government is trying to do something about the 1 billion food items rotting in our landfills annually.
Amended National School Lunch Act	Schools now have the same protections as businesses under the 1996 Bill Emerson Good Samaritan Act.
Food Waste Challenge	The government will acknowledge your school as a participant in protecting the environment from methane gas emissions.
K12 Food Rescue is NOT a food donation program	While food pantries benefit, students are NEVER encouraged or pressured to donate the food they want to eat. They are only encouraged to divert their unwanted food from landfills by placing it in the food recovery bin.

Do you know what's in your school's trash?
